The University of Illinois at Chicago Senate has nominated the following persons for conferral of honorary degrees at the Commencement exercises in May 2017.

The chancellor, University of Illinois at Chicago, and vice president, University of Illinois, recommends approval of these nominations.

Kevin M. Lynch, vice president of technology, Apple, Inc.—the honorary degree of Doctor of Engineering

Kevin M. Lynch is one of the world’s preeminent software developers and technology innovators. His work has included leadership roles on some of the most influential software development efforts over the last 25 years at companies including Apple, Adobe Systems, Macromedia, General Magic, and Frame Technology.

As the vice president of technology at Apple, Mr. Lynch has focused on the innovative software of the Apple Watch and the company’s health software effort of HealthKit and ResearchKit on the iPhone. Before he joined Apple in 2013, he was chief technology officer at Adobe, where he focused the company on mobile, social, and cloud technology. He also led Adobe’s transformation from a shrink wrapped software company to the introduction of Creative Cloud. In 1996, he joined Macromedia and led its move to web publishing, including the creation of Dreamweaver, the best known software for authorizing HTML. Mr. Lynch helped enhance multimedia on the web via Flash, reaching more than 1 billion people and enabling early web with video, audio, rich interactivity, vector graphics, and custom fonts. In 2005, Mr. Lynch was involved with Macromedia’s $3.4 billion acquisition by its biggest rival, Adobe.

Starting at an early age, Mr. Lynch taught himself software development with free access to a DEC PDP-11 and help of his math teachers at Lincoln-Way High School. The summer after his high school graduation, he worked with friends to create an early bitmap graphic adventure game for Macintosh called Legacy, which was successfully marketed. In the fall of 1984, Mr. Lynch enrolled in the UIC College of Engineering as a computer science major, where he was also a member of the Honors College. During
his freshman year, he began working with artists and engineers in UIC’s famed Electronic Visualization Laboratory (EVL). At the EVL, Mr. Lynch helped create one of the first Mac software startups, the first 2D+3D drawing application for the Mac, and innovative desktop publishing software, whose elements are now mainstream in desktop software today.

Eliminate the Master of Arts in Mathematics, College of Liberal Arts and Sciences and the Graduate College, Chicago

(7) The chancellor, University of Illinois at Chicago, and vice president, University of Illinois, with the advice of the Chicago Senate, the College of Liberal Arts and Sciences, and the Graduate College, recommends the elimination of the Master of Arts in Mathematics.

The Department of Mathematics, Statistics, and Computer Science currently offers both a Master of Arts (MA) and Master of Science (MS) in Mathematics. The requirements for both degrees are identical, and students must complete 32-semester hours of coursework; a concentration in pure mathematics, applied mathematics, mathematical computer science, or probability and statistics; and either a comprehensive examination or thesis. The elimination of the MA will have no impact on students as
none are currently enrolled, and only one student has completed the degree since 2010. The MS in Mathematics will be retained.

The Board action recommended in this item complies in all material respects with applicable State and federal laws, University of Illinois Statutes, The General Rules Concerning University Organization and Procedure, and Board of Trustees policies and directives.

The executive vice president and vice president for academic affairs concurs with this recommendation. The University Senates Conference has indicated that no further senate jurisdiction is involved.

The president of the University recommends approval. This action is subject to further review and approval by the Illinois Board of Higher Education.

On motion of Mr. Estrada, seconded by Ms. Smart, this recommendation was approved.

Establish a Doctor of Medicine Degree and Curriculum, Carle Illinois College of Medicine, Urbana

(8) The chancellor, University of Illinois at Urbana-Champaign, and vice president, University of Illinois, recommends approval of a proposal from the Carle Illinois College of Medicine to establish a Doctor of Medicine degree and curriculum. This recommendation comes with the advice and approval of the Senate of the University of Illinois at Urbana-Champaign.
The Doctor of Medicine degree is the initial and foundational degree to be offered by the new Carle Illinois College of Medicine (CICOM). The Senate approved creating the CICOM on February 9, 2015, and the Board of Trustees subsequently approved and created the CICOM on March 12, 2015. The proposed MD degree is a four-year program that integrates engineering concepts with the traditional pillars of medicine, namely the basic health sciences and clinical training. The case-driven, active learning curriculum includes professional training elements and fundamental knowledge instruction through small team-based and problem-based learning. The core coursework, required clinical rotations, and electives allow the student to pursue individual areas of clinical and engineering interest. Performance in all courses and rotations will be assessed on a pass/fail basis, as is common practice in many peer schools of medicine.

The program will produce graduates who are physician leaders and innovators, trained and equipped to incorporate analytical and quantitative techniques, modeling and computation, innovation, and human systems approaches to advancing and delivering high-quality healthcare. The CICOM MD program is designed to meet the Liaison Committee for Medical Education (LCME) accreditation requirements and prepare graduates to succeed on all parts of the required United States Medical Licensing Examinations.

The Board action recommended in this item complies in all material respects with applicable State and federal laws, University of Illinois Statutes, The
General Rules Concerning University Organization and Procedure, and Board of Trustees policies and directives.

The executive vice president and vice president for academic affairs concurs with this recommendation. The University Senates Conference has indicated that no further senate jurisdiction is involved.

The president of the University recommends approval. This action is subject to further review and approval by the Illinois Board of Higher Education.

On motion of Mr. Estrada, seconded by Ms. Smart, this recommendation was approved.

Establish the Interdisciplinary Health Sciences Institute,
Office of the Vice Chancellor for Research, Urbana

The chancellor, University of Illinois at Urbana-Champaign, and vice president, University of Illinois, with the advice of the Urbana-Champaign Senate, recommends approval of a proposal from the Office of the Vice Chancellor for Research to establish the Interdisciplinary Health Sciences Institute.

The mission of the Interdisciplinary Health Sciences Institute (IHSI) is to harness and enhance University-wide expertise and infrastructure towards establishing the University of Illinois at Urbana-Champaign as a leading provider of innovative health research solutions, and as an internationally recognized and funded leader in health sciences research and technology. The IHSI provides the critical hub for empowering and catalyzing the integration of health science and technology-related research.
University-wide. IHSI will be a virtual institute that coordinates existing resources internally and at clinical partner sites, to synergistically strengthen the overall research grant portfolio and enhance funding potential. The near-term strategic objectives of IHSI are to facilitate: 1) coordination of expertise around specific health-related topics; 2) development and management of partnerships with strategic external clinical sites, corporations, and health-focused organizations; and 3) support of services to facilitate the pursuit of clinical and translational research.

Currently, the research areas for which IHSI will bring together health sciences and technology across units are: 1) cancer, 2) clinical and translational neuroscience, 3) precision medicine, 4) heart and vascular health, 5) metabolic and digestive health, and 6) health equity. ISHI administratively supports these research program areas and themes, catalyzing research internally and with clinical partners. The IHSI fosters economic development through coordination of this thematic research that shows clear potential for practical outcomes.

The Board action recommended in this item complies in all material respects with applicable State and federal laws, University of Illinois Statutes, The General Rules Concerning University Organization and Procedure, and Board of Trustees policies and directives.

Approve University of Illinois Community Assessment of Needs Implementation Plan, University of Illinois Hospital and Health Sciences System, Chicago

(11) The chancellor, University of Illinois at Chicago, and vice president, University of Illinois, with the advice of the vice chancellor for health affairs, recommends the adoption of the phased implementation plan identified in the University of Illinois Community Assessment of Needs (UI-CAN) 2016: Toward Health Equity Report to meet the Community Health Needs Assessment (CHNA) requirements described below.

In March 2010, the Affordable Care Act outlined new federal requirements that all tax-exempt, charitable hospitals must complete a CHNA every three years. The CHNA must define and assess a hospital’s primary service area, as well as identify the high-priority health needs that exist in those communities. Additionally, the hospital is required to develop an implementation plan outlining strategies for addressing the
identified health needs. As the authorized body of the University of Illinois Hospital, the Board of Trustees must adopt the implementation plan no later than November 15, 2016.

The *University of Illinois Community Assessment of Needs (UI-CAN) 2016: Toward Health Equity Report* was finalized in June 2016 and identified three broad high priority health-related needs:

1. Addressing the social determinants of health;

2. Improving access to care; and,

3. Reducing the risk of chronic disease or the impact of chronic disease on health.

As an urban research university and an academic health center, the University of Illinois at Chicago is working with faculty, students, staff, and external stakeholders to develop a four-stage implementation plan that leverages the strength of UIC and its partners to meet the health-related needs identified in the 2016 UI-CAN, these include:

1. Assess the current state of initiatives at UIC that address the identified health-related needs in the 2016 UI-CAN;

2. Develop new strategies to address gaps in services to meet the health-related needs in the 2016 UI-CAN;

3. Implement newly developed strategies to address health-related needs; and,

4. Evaluate the implemented strategies and conduct a community impact assessment.
The 2016 UI-CAN report and implementation plan has been shared with various UIC groups and stakeholders, including the UIC Health Sciences Council on September 9, 2016, and the UIC Senate Executive Committee on September 22, 2016.

Designate the G. Stephen and Kathleen Irwin Learning Center Auditorium, College of Medicine, Chicago

The chancellor, University of Illinois at Chicago, and vice president, University of Illinois, recommends the naming of the Learning Center Auditorium in the College of Medicine West Tower, 1863 West Polk Street, in recognition of Dr. G. Stephen and Kathleen Irwin’s gift towards the renovation of the space, their multimillion dollar commitments to the University, and their significant advocacy and volunteerism for the College of Medicine.

The College of Medicine Learning Center Auditorium opened in August 2014 as a 220-seat auditorium with connectivity technology that promotes interaction, communication, and collaboration resulting in the formation of dynamic new cohorts of
learners, regardless of geography. Its innovative technology removes the physical barriers between students, clinicians, and scientists in the pursuit of advanced understanding of medical knowledge and clinical applications.

In 1977, Dr. G. Stephen Irwin graduated from the University of Illinois College of Medicine at Chicago, obtaining his degree in clinical medicine. Dr. Irwin practiced orthopedic surgery at McLean County Orthopedics, Ltd., in Bloomington, Illinois. He is a member of numerous medical societies including the American Academy of Orthopedic Surgeons, the Illinois Orthopedic Society, and the Mid-America Orthopedic Society. Dr. Irwin is a founder and former practitioner at the Center of Outpatient Medicine in Bloomington.

Mrs. Kathleen Irwin studied anthropology at the University of Illinois at Chicago and received a degree in nursing from Ravenswood Hospital School of Nursing in Chicago. She is a former registered nurse and practice manager at McLean County Orthopedics in Bloomington, Illinois.

Dr. and Mrs. Irwin have contributed gifts to the Department of Orthopedics to complete the Dr. Riad Barmada Professorship, established charitable trusts through their estate to fund endowed scholarships, and made a major gift to support the renovation of the Learning Center. Dr. Irwin is a member of the board of directors of the University of Illinois Foundation and the Irwins are both Foundation members. Dr. Irwin has served on the UIC Medical Advancement Council, the University of Illinois College of Medicine Thought Leaders, and the UIC Chancellor's Campaign Committee. Dr. and
Mrs. Irwin are also recognized as University of Illinois College of Medicine Root Society members.

The Board action recommended in this item complies in all material respects with applicable State and federal laws, University of Illinois Statutes, The General Rules Concerning University Organization and Procedure, and Board of Trustees policies and directives.

The president of the University concurs.

On motion of Mr. Estrada, seconded by Ms. Smart, this recommendation was approved.

Mr. McMillan reiterated his support for item no. 1, “Resolution Endorsing University of Illinois Investment, Performance and Accountability Commitment.”

By consensus, the Board agreed that one roll call vote would be taken and considered the vote on agenda item nos. 13 through 20 inclusive as listed below. The recommendations were individually discussed but acted upon at one time.

Approve Requests for Operating and Capital Appropriations, Fiscal Year 2018

(13) Requests for operating funds and for new capital appropriations for the University of Illinois for the fiscal year commencing July 1, 2017, are presented for action by the Board of Trustees. Following Board action, these requests will be
submitted to the Illinois Board of Higher Education and state agencies for review. The accompanying document, *Fiscal Year 2018 Budget Request for Operating and Capital Funds* (copy filed with the secretary of the Board for record), provides detailed descriptions of each program and project included in the request.

The continued budgetary uncertainty in Illinois State Government has impacted the University of Illinois. The University recognizes the State’s financial condition, and consequently is requesting the State Fiscal Year 2018 funding levels be restored to the starting Fiscal Year 2015 level of $662.1 million. The University of Illinois will continue to allocate funding toward its core missions, with emphasis on supporting in-state students as well as enhancing the overall competitiveness of the institution.

The Fiscal Year 2018 capital budget request identifies the University’s strategic capital priorities. These strategic capital priorities have been chosen based on their contributions to the University’s goals outlined in the Strategic Framework planning document. Together, these priorities represent a $414.4 million investment. Remodeling and renovation projects comprise a large part of the total funds requested, reflecting the importance the University places on maintenance and upkeep of existing facilities. Although it does not present a comprehensive list of capital needs, the Fiscal Year 2018 capital budget request recognizes the financial constraints facing the State of Illinois, and highlights only the University’s highest strategic capital priorities.
Due to the unique characteristic of health care funding for Medicaid Patient Activity at the University of Illinois Hospital and Health Sciences System (UI Health), $25.0 million for UI Health is being pursued independently in this request.

The operating and capital requests reflect the University’s highest priority budget needs, focusing on the University’s mission of education, research, public service, and economic development. The priorities in both the operating and capital requests are consistent with those in the preliminary requests presented to the Audit, Budget, Finance, and Facilities Committee in October 2016.

The Board action recommended in this item complies in all material respects with applicable State and federal laws, University of Illinois Statutes, The General Rules Concerning University Organization and Procedure, and Board of Trustees policies and directives.

The executive vice president and vice president for academic affairs and the vice president/chief financial officer recommend approval.

The president of the University concurs.

On motion of Dr. Koritz, seconded by Ms. Smart, the requests for operating and capital appropriations for Fiscal Year 2018 were approved by the following vote: Aye, Mr. Estrada, Mr. Fitzgerald, Ms. Hasara, Ms. Holmes, Dr. Koritz, Mr. McMillan, Mr. Montgomery, Mr. Schumock, Ms. Smart; No, none; Absent, Mr. Cepeda, Governor Rauner.

Approve Fiscal Year 2017 Services and Management Agreement for the University of Illinois Foundation

The vice president/chief financial officer and comptroller recommends the renewal of the services and management agreement with the University of Illinois Foundation (Foundation) for Fiscal Year 2017. Since 1982, the Board of Trustees has designated the Foundation as a University-Related Organization and authorized basic service agreements for certain services. The award of this agreement is in accordance with the procedures of the Illinois Procurement Code, and the *University Guidelines of the Legislative Audit Commission*.

The agreement requires the Foundation to provide fundraising services and other assistance to attract private gift funds to support University programs. The Foundation agrees to accept and administer such gifts according to terms specified by the donor, to inform the University of all gifts received for the benefit of the University, and to apply the same in accord with the terms of the gift or, as in the case of all undesignated gifts, as the University may determine. The Foundation also will provide management and supervisory services for the maintenance of donor records and alumni tracking on the Tracking and Engagement Database (TED) as part of the Foundation’s Advance Illinois (AI) project. The Foundation assesses a management fee to the Foundation endowment pool as a means to support private gift fundraising, administrative, and stewardship operations.
Contingent upon the University funding provided within the Fiscal Year 2017 State budget, the University will provide direct support for the Foundation at an estimated total amount of $7,392,700 for Fiscal Year 2017. The support will be provided through payments to the Foundation during the course of the year based upon actual costs incurred and through funds allocated to the University Office of Development for the maintenance of donor records and other fund-raising support functions. This funding includes $1,943,000 for the Foundation’s Road Map investment in support of increased development and fundraising plans. Certain routine business and financial services will be provided to the Foundation as needed. Also provided is the employer cost of benefits for University employees working in the Office of Development.

The University will provide reimbursement during Fiscal Year 2017 to partially support the costs of the Foundation’s services related to the Advance Illinois project. In the two previous fiscal years the University allocated a total of $8,500,000 for reimbursement to the Foundation for the project ($4,500,000 in Fiscal Year 2014 and $4,000,000 in Fiscal Year 2015). The Foundation and the University have acknowledged that at the end of Fiscal Year 2016 there existed a residual balance of $1,146,687 from the previous years’ allocation which may be carried forward and paid to the Foundation in Fiscal Year 2017 as reimbursement to partially support the Foundation’s services related to the Advance Illinois project.
Institutional funds, generated from a management fee assessed to University gift accounts, and State appropriated funds are available to support this agreement for Fiscal Year 2017. The amount shown as the annual payment from the University for the Foundation is an estimate; the exact amount may vary depending on appropriations in the State budget and other financial and budgetary factors. The exact amount will be reported to the Board at its next meeting after June 30 of any given calendar year.

The Foundation shall provide regular budgetary, financial, and audit reports to the University and advise the University of key personnel transactions. The Foundation shall provide regular updates on the AI project and the Road Map investment and report to the Board benchmark metrics within its peer group. The University shall be notified of any changes in administrative and investment management fees and changes in endowment spending formulas.

The Board action recommended in this item complies in all material respects with applicable State and federal laws, University of Illinois Statutes, The General Rules Concerning University Organization and Procedure, and Board of Trustees policies and directives.

In May 2016, the campus approved proceeding with a Qualifications Based Selection process to secure the services of a Professional Services Consultant for the conceptualization phase of the proposed project, including planning, programming, partial schematic design, utility analysis, and sustainable building systems review. The conceptualization phase is currently underway and helped establish the program and budget for this new building. The selection of the architect/engineer for this project was in accordance with the requirements and provisions of the Public Act 86-673 (Architectural, Engineering and Land Surveying Qualifications-Based Selection Act).

The College of Engineering Modular Design Building will be located at the southeast corner of Morgan and Taylor streets and will be situated directly west of the Science and Engineering South Building located at 845 West Taylor Street. This new building is for the College of Engineering which is experiencing significant growth in its undergraduate and graduate programs that cannot be adequately accommodated in existing facilities. New space is envisioned to be constructed for the Chemical Engineering, Civil and Materials Engineering, and Mechanical and Industrial
Engineering departments. Additionally, student workshop and “maker” spaces will be constructed to support instruction across all departments within the College.

The building is expected to be approximately 70,000 gross square feet in size and is intended to support a high-bay structural testing laboratory, wet labs, dry labs, student workshops, offices, and classroom space. The building will feature design elements such as modular laboratory bays to maximize flexibility to support future programs. It is also anticipated to feature modular construction components such as pre-fabricated architectural panels to help reduce costs and speed construction. The project will be designed to LEED Silver at a minimum with LEED Gold as an aspirational goal.

Accordingly, the chancellor, University of Illinois at Chicago, and vice president, University of Illinois, with the concurrence of the appropriate administrative officers, recommends that the College of Engineering Modular Design Building project budget be increased to a full budget of $34,000,000.

Additionally, in order for the project to proceed, it is necessary to employ a construction manager for construction management services, including scope, schedule, and budget management. The selection of the construction manager for this project was in accordance with the requirements and provisions of the Illinois Procurement Code.\(^5\)

Increase Project Budget and Amend Professional Services Consultant Contract for Renovation and Addition, Dining Facility, Illinois Street Residence Hall, Urbana committee recommends Berglund Construction Company, Chicago, IL, as best meeting the criteria for the project.
In January 2012, a conceptualization study received campus approval to evaluate the renovation and possible expansion of the existing dining services building at the Illinois Street Residence Hall. The location of this complex, close to the College of Engineering, serves as a tour destination for prospective students, making this facility strategically important to University Housing. The conceptualization phase was completed in May 2013, proposing a renovation and expansion of the facility that includes increasing the seating capacity in the Dining Facility to meet current needs; expanding the facility for Residential Life in the complex; and updating existing infrastructure, heating, ventilation and air conditioning, plumbing and electrical systems, building accessibility, facility visibility, and the building exterior. Based on the conceptualization phase results, the cost to complete this project, including the design and construction, will require a budget increase of $69,440,000.

Accordingly, the chancellor, University of Illinois at Urbana-Champaign and vice president, University of Illinois, with the concurrence of the appropriate administrative officers, recommends that the Board approve the increase in project budget for this project to $69,760,000, an increase of $69,440,000.

In order for the project to proceed, it is necessary to amend the Professional Services Consultant contract for the required professional services. The selection of the Professional Services Consultant for this project was in accordance with the requirements and provisions of Public Act 87-673 (Architectural, Engineering and Land Surveying
Qualifications-Based Selection Act). Accordingly, the chancellor, University of Illinois at Urbana-Champaign, and vice president, University of Illinois, with the concurrence of the appropriate administrative officers, recommends that Booth Hansen, LTD, Chicago, Illinois, continue to be employed and their contract amended for the professional services required for the schematic design, design development, construction documents, bidding, and construction administration phases of the project. The firm’s total fixed fee will be $3,193,555; for on-site observation on an hourly basis not to exceed $222,250; for warranty phase on an hourly basis not to exceed $26,980; for other supplemental services a fixed fee of $693,207; for other supplemental services on an hourly not to exceed basis of $109,000; and for authorized reimbursable expenses estimated at $224,200 for a total amended contract of $4,469,192 (an increase of $4,170,942).

Employ Construction Manager for the Renovation and Addition, Mechanical Engineering Building, Urbana

In October 2012, a project for the conceptualization phase for the renovation and addition of the Mechanical Engineering Building project was approved. The conceptualization phase was completed in December 2015. In July 2016, the Board approved a budget increase to support the design and construction, an increase to the current project budget of $35,434,041. The proposed renovation of the existing south building is intended to provide better utilization of space to meet current programmatic needs and include significant improvements to the building envelope to reduce energy consumption. The project consists of a new addition to the east end of the existing south building along Green Street and Goodwin Avenue, at the southeast corner of the site. The addition will provide new state-of-the-art instructional facilities including a number
of large “active learning classrooms” with new audio-visual systems. It will also house the Innovation and Design Commons and an open student collaboration space. An infill of the existing facility’s exterior courtyard (between the main south and north buildings) is also proposed, which is intended to expand the existing facility’s basement level, creating a new Senior Design Studio.

In order for the project to proceed, it is necessary to employ a construction manager for the design development, construction documents, bidding, and construction phases of the project. The selection of the construction manager for this project was in accordance with the requirements and provisions of the Illinois Procurement Code.  

Accordingly, the chancellor, University of Illinois at Urbana-Champaign, and vice president, University of Illinois, with the concurrence of the appropriate administrative officers, recommends that Gilbane Building Company, Chicago, Illinois, be employed for the construction management services required for the project for a fixed fee of $609,855 and staff cost on an hourly basis with the total not to exceed $1,244,967 plus reimbursable expenses estimated to be $184,030.

President’s Report on Actions of the Senates

(21) The president presented the following report:

Revise the Bachelor of Science in Early Childhood Education, College of Education, Urbana

The Urbana-Champaign Senate has approved a proposal from the College of Education to revise the Bachelor of Science degree for the major in Early Childhood Education. The major has been revised in keeping with Illinois State Board of Education standards. As a result of these curricular revisions, the total minimum hours required for the major is changed from 129 to 120.
Revise the Certificate of Advanced Study in Urban Education Leadership and Doctor of Education in Urban Education Leadership, College of Education and the Graduate College, Chicago

The Chicago Senate, with the recommendation of the College of Education and the Graduate College, has approved the revision of the post-master’s Certificate of Advanced Study in Urban Education Leadership and Doctor of Education in Urban Education Leadership.

The program in Urban Education Leadership is designed to prepare and develop principals who are able to lead significantly improved teaching and learning in urban, K through 12 schools. The program combines coursework with supervised practicum experiences/leadership coaching, and an emphasis on collaborative data collection and analysis at the school level. Students can pursue the Certificate in Advanced Study (CAS) or the doctorate (EdD), and may also complete additional courses required for the Illinois P through 12 Principal Endorsement.

The program proposes to increase the number of hours of leadership coaching, which is increasingly identified in the research literature as critical to the development of aspiring and novice principals, from 4 hours to 16 hours. In addition, the hours of capstone study required for the EdD will be reduced from 12 hours to 8 hours. As a result, the total number of hours required to earn the certificate and degree will increase from 64 hours to 76 hours (CAS) and 80 hours to 88 hours (EdD).

These changes will ensure that program requirements accurately reflect the amount of coaching and capstone supervision that students actually receive. However,
the increase in credit hours will not extend the length of time to certificate or degree. Students will simply enroll for additional hours of coaching during the semesters in which they are already working with coaches.
