In March 2008, the Board approved the \$3.4 million project to address interior and exterior repairs to the English Building. The project repairs the exterior building envelope and electrical system and provides interior finishes and life safety systems. The exterior repairs include selective tuck pointing of deteriorated masonry joints, slate roofing systems and exterior steps as well as replacement of exterior doors. The life safety components are additional sprinklers, emergency lighting, exit signage, and fire barrier and exit enclosure repairs. The project also replaces the obsolete main electrical service and installs lightning protection, new exterior lighting, energy conserving lighting fixtures, and energy efficient temperature controls.

Subsequent to this approval, additional funding became available to provide repairs and renovations in the English Building restrooms. The additional scope of work will include repairs to the plumbing and ventilation systems, new lighting fixtures, and

accessible toilet fixtures, and repairs and renovations to the floors, walls, and ceiling finishes.
