CONSOLIDATE, RENAME, AND REVISE THE DOCTOR OF PHILOSOPHY IN
BIOPHARMACEUTICAL SCIENCES, DOCTOR OF PHILOSOPHY IN MEDICINAL
CHEMISTRY, AND DOCTOR OF PHILOSOPHY IN PHARMACOGNOSY,
COLLEGE OF PHARMACY AND THE GRADUATE COLLEGE, CHICAGO

Action: Consolidate, Rename, and Revise the Doctor of Philosophy in
Biopharmaceutical Sciences, Doctor of Philosophy in Medicinal Chemistry,
and Doctor of Philosophy in Pharmacognosy, College of Pharmacy and the
Graduate College

Funding: No New Funding Required

The Chancellor, University of Illinois at Chicago, and Vice President,
University of Illinois with the advice of the Chicago Senate, the College of Pharmacy,
and the Graduate College, recommends the consolidation, renaming, and revision of three
doctoral degrees: Biopharmaceutical Sciences, Medicinal Chemistry, and
Pharmacognosy, into a single Doctor of Philosophy in Pharmaceutical Sciences.

These curricular changes are affiliated with the recently approved
consolidation of the Department of Biopharmaceutical Sciences and Department of
Medicinal Chemistry and Pharmacognosy. The graduate program in Pharmaceutical
Sciences will be created effective Fall 2020. The Doctor of Philosophy will require 96
hours from the baccalaureate, including a required core, research rotations, coursework in
a concentration, electives, and a dissertation. Students must complete one of five
concentrations in Pharmaceutics and Drug Delivery, Pharmacognosy, Chemistry in Drug Discovery, Molecular Mechanisms and Therapeutics, or Forensics.

Students will only be admitted to the Ph.D., but the Master of Science in Pharmaceutical Sciences will be awarded if students do not wish to or are unable to finish their doctoral studies and have met the requirements of the M.S. Students who do not complete the Ph.D. under the Concentration in Forensics will have an option to transfer into the standalone M.S. in Forensic Science or M.S. in Forensic Toxicology degrees.

This reorganization will enhance and modernize graduate education; reflect the changing interdisciplinary nature of education in the pharmaceutical sciences; align the College of Pharmacy’s basic science education with the national model; and promote better student recruitment and quality of education as a result of broader choice of specialization and faculty advising.

The Board action recommended in this item complies in all material respects with applicable State and federal laws, University of Illinois Statutes, The General Rules Concerning University Organization and Procedure, and Board of Trustees policies and directives.

The Executive Vice President and Vice President for Academic Affairs concurs with this recommendation. The University Senates Conference has indicated that no further Senate jurisdiction is involved.

The President of the University recommends approval. This action is subject to further review and approval by the Illinois Board of Higher Education.
