

Board Meeting
May 17, 2018

ROLL CALL

APPROVE PROJECT FOR LIFE SAFETY, HEATING, VENTILATION AND AIR CONDITIONING UPGRADES, DIGITAL COMPUTER LABORATORY, URBANA

Action: Approve Project for Life Safety, Heating, Ventilation, and Air Conditioning Upgrades, Digital Computer Laboratory

Funding: Academic Facilities Maintenance Fund Assessment Fund

The Digital Computer Laboratory was built in 1958 with further expansions in 1962, 1965, and 1990. The project currently requesting approval includes the oldest sections of the building: 1958, 1962, and 1965. This portion of the building primarily serves Technology Services and Engineering. The proposed \$6.5 million project addresses deficiencies with the fire suppression system and heating, ventilation and air conditioning systems within the older sections of the building, which are currently without a fire suppression (sprinkler) system. This will also address the mechanical systems within the older sections of the building which have exceeded their normal useful life. The upgrades will also reduce maintenance costs, reduce energy consumption, and improve the occupants' working and learning environments.

Accordingly, the Chancellor, University of Illinois at Urbana-Champaign, and Vice President, University of Illinois with the concurrence of the appropriate administrative officers, recommends that the Life Safety, Heating, Ventilation, and Air Conditioning Upgrades for the Digital Computer Laboratory be approved with a budget

of \$6.5 million.

The Board action recommended in this item complies in all material respects with applicable State and federal laws, University of Illinois *Statutes, The General Rules Concerning University Organization and Procedure*, and Board of Trustees policies and directives.

Funds for this project are available from the Academic Facilities Maintenance Fund Assessment fund.

The President of the University concurs.
