Ms. Zemaitis outlined the work of the office and the status of audit plans, and noted that sixteen reports were issued during this period. The audit report findings by campus were discussed, including those related to information technology and grant compliance audits. Mr. McMillan said that he was pleased with the rate at which issues are being addressed University-wide. Ms. Zemaitis commented that the vision of her office is to be an innovative driver of positive change, and Mr. McMillan thanked Ms. Zemaitis for her report.

Enterprise-Wide Risk Management

Next, Mr. McMillan asked Mr. Daniel Mortland, assistant director, enterprise risk management, to provide a presentation on enterprise-wide risk management (materials on file with the clerk). Mr. Mortland explained the process for reviewing issues related to risk, including discovery, evaluation, communication, and response. He then described the components of risk scores, gave examples of risk within the University, and explained how risk response strategies are developed. He also provided an overview of next steps in this assessment. Mr. Montgomery inquired about the risks identified as medical facility constraints and capital programs and construction. Mr. Mortland provided additional information about these risks and explained that they are already receiving adequate attention by the risk owner or University. Additional discussion followed regarding the function of an executive steering
committee and a working committee. Ms. Strobel inquired about updates to ensure that risks are being addressed, and Mr. McMillan commented that the level of frequency to receive these reports has not yet been established.

Compliance Audit Report, Fiscal Year 2011
Financial Audit Report, Fiscal Year 2011

Mr. McMillan then introduced Ms. Maxine Sandretto, assistant vice president for business and finance, and Mr. Patrick Patterson, controller and senior assistant vice president for business and finance, to present the fiscal year 2011 compliance audit report and financial audit report (materials on file with the clerk). Mr. Patterson discussed the financial audit which was conducted by the firm KPMG on behalf of the Illinois Office of the Auditor General. He commented that the financial audit was a well-coordinated effort by everyone involved and generated three findings, which related to information technology systems access; procurement card procedures; and year-end receivables and payable accrual processes. He then provided some financial statement highlights. Discussion regarding procurement cards followed, and Ms. Sandretto explained that the number of procurement card users was declining and that authorization occurs at the departmental level, noting that compliance is enforced in the procurement card office.

Ms. Sandretto then commented on the State and Federal compliance audit and provided a summary of the audit findings, as well as the classifications of these findings. She described the causes of these findings and discussed the resolution process, noting that these findings have not appeared to impact the University's ability to receive grant funding. Mr. McMillan commented that the material weaknesses as defined by the auditors seem insignificant compared to those that might be identified in the private sector.

Committee members then reviewed the recommended items on the Board’s agenda for its meeting on May 31, 2012 that are within the purview of the committee.
