

## SECOND DAY'S SESSION.

The Board convened at 8:30 A. M.

Present—Messrs. Cobb, Bennett, Mason, McLean, Pearman and Paden.

Absent—Governor Cullom, Messrs. Bird, Millard and Scott.

The minutes of last meeting were read and adopted.

The Regent then read his report, which was received.

*To the Trustees of the Illinois Industrial University:*

GENTLEMEN—The prosperous condition of business generally, and especially of the agricultural interests of our State, the increased inquiry for catalogues and other information, and the numbers which have appeared already, both of former students and of applicants for admission, all indicate an attendance larger than has been known here for some years.

An immediate duty is to provide adequate and competent instructors. To this subject I have given the most constant and careful attention, pursuant to instructions received from you at your last meeting, and I have now to present the following nominations:

For Professor of Chemistry, William McMurtrie, Ph.D., of Washington, D. C., late chief chemist of the Department of Agriculture. From the very strong endorsements given to Prof. McMurtrie by leading chemists at the East, from the record he has made while in the department as chief chemist, as Superintendent of Agriculture in the United States Section of the Paris Exposition of 1878, and as a specialist in working out important industrial problems at home, and from personal acquaintance, I am led to believe that the chemical instruction in this University will in no way suffer if committed to his charge.

For Professor of Zoology and Geology I name Benjamin C. Jillson, M. D., Ph. D., of Pittsburg, Pa. Dr. Jillson is a graduate of Yale College; he was employed on the geological survey of Tennessee; was Professor of Geology and Zoology in Tennessee, and afterward in the Western University of Pennsylvania; was for nine years Principal of the Pittsburgh High School, giving to it a character and fame of the first class. Dr. Jillson will bring to us sound learning, large experience, and a thorough knowledge of the wants of a department which waits for the hand of a master-builder.

Professor W. A. Kellerman, of the Agricultural College of Kentucky, at Lexington, presents strong recommendations, and would do good service.

For Instructor in Ancient Languages and Preceptrix, I would name Miss Florence C. Perkins, now of the Cleveland High School. Miss Perkins is a graduate and valedictorian of Vassar College, and has been employed there as instructor in Latin and Greek. She has since made a good record in the High Schools of Burlington, Vt., and Cleveland, O. She brings evidence of ability to instruct in any line of work which we should desire to give her. Chiefly, however, I have sought a lady who would possess the tact and capacity to act as preceptrix for the young ladies of the University. While the duties of this position may be less obtrusive, they will in fact be more important than the work of an instructor. The qualities needed will be peculiar and rare. I have not been able to secure elsewhere the same promise of excellence that she seems to possess.

Authority is asked that the Regent and the Professor of Chemistry may appoint one, and if it should seem needful, two second assistants in the Chemical Laboratory.

Authority is asked for the appointment of another instructor for the preparatory class, if the increased numbers of that class should require such assistance.

Also, that the Faculty may appoint an Instructor of Elocution on the same terms as for the last two years.

I present the request of Mr. Kimball for an increase of salary. I can say no more in regard to it, than to express again the high opinion I have always held as to Mr. Kimball's usefulness in his present position, and to ask that you will give his request the consideration it deserves.

#### THE MACHINE SHOP.

The alterations therein have been made as authorized at your last meeting. It will now be possible to systematize the work more than heretofore, and thus to provide better for the constantly growing classes in this specialty. It is part of the same design that more tools should be added, and I ask an appropriation of \$200 for that purpose.

I have had plans and estimates prepared for erecting an addition to the machine shop, to be used as a blacksmith's shop and foundry, to contain 16 fires, and to cost — dollars. I suggest that the Legislature be asked to furnish the means for building this addition, with — dollars for additional machinery and tools for the Mechanical and Architectural departments. These increased facilities are each year more imperatively needed, and I believe that such requests would meet a very cordial response.

#### THE LIBRARY.

The improvement authorized in this room has been made by constructing cases along the south and west walls, and by arranging the floor cases to form four alcoves at the south end. The accommodation for books has been increased by — feet of shelving, with space for volumes. The nature of the improvement made it desirable to bring it to its present degree of completeness. The cost has exceeded the appropriation by \$65.88, and the iron railing is left to be added at a future time.

An assignment of \$1,000 is asked from the Library appropriation for the purchase of new books.

The repairs of the upper room in the west wing have been completed, and the room will be occupied by the College of Engineers for their museum, as soon as possible. While making these repairs it was found that a portion of the ceiling in the art gallery was in danger of falling, and by advice of the Executive Committee that has been taken down and replaced.

I present the usual report from the Professor of Agriculture.

I recommend that appropriations be made for the usual expenses of the next six months according to the list presented by the Business Agent.

Also, that \$60 be granted for mattings for hall.

Progress has been made in the preparation of the inventories of apparatus and other movable property, as desired by you, but they cannot be completed before your next meeting.

Should the Alethenal Society so desire, I suggest that they be permitted the use of the room soon to be vacated by the Adelphe Society, and that the room finally left vacant be assigned for the use of the Young Men's Christian Association, with leave to use heat and gas.

I respectfully ask attention to the following subjects:

1. To a determination of the items to be asked of the next Legislature.
2. To a consideration of the means necessary to meet the financial necessities of the University, caused by the steady diminution in the income from the endowment.

Respectfully submitted,

S. H. PEABODY, *Regent.*

On recommendation of the Regent, the following appointments were made:

Dr. William McMurtrie to be Professor of Chemistry for the present academic year, at a salary of \$2,000 per annum; Dr. B. C. Jillson, to be Professor of Zoology and Geology for the present academic year, at a salary of \$2,000 per annum; Miss Florence C. Perkins, to be Instructor in Ancient Languages and Preceptress, for the present academic year, at a salary of \$1,200 per annum.

The Regent was authorized to employ a competent assistant, in case Miss Perkins could not accept the position.

The Regent and Professor of Chemistry were authorized to employ one, and if need be two assistants in the Chemical Laboratory, at a salary of \$15 per month.

The Faculty were empowered to appoint an Instructor in Elocution, who is to receive the collected fees for his services.

Authority was given to the Regent to employ another instructor in the Preparatory Department, if necessary, salary not to exceed \$40 per month.

The salary of Mr. E. A. Kimball, foreman of Mechanical Shop, was increased to \$1,500 per annum. The salary of the Business Agent was fixed at \$25 per month for the next six months.

The Treasurer's report was received, and referred to the Auditing Committee:

URBANA, September 12th, 1881.

JOHN W. BUNN, *Treasurer.*

The following report was read:

ILLINOIS INDUSTRIAL UNIVERSITY, COLLEGE OF AGRICULTURE,  
CHAMPAIGN, ILL., Sept. 11, 1882.*Dr. S. H. Peabody, Regent:*

I am glad to be able to report the affairs of the farm, as a whole, in good condition. We harvested the grain crops and most of the hay in good condition. By measurements of the threshers, we have, in round numbers: Oats, 1,200 bushels; rye, 675 bushels; timothy seed, 100 bushels; wheat, 40 bushels. The latter small amount was of varieties being tested. Three of these are quite promising; well worthy of further trial. Most of the timothy seed has been sold, at \$2.10 per bushel, a sale which now seems to have been a good one. At present prices it has not been thought advisable to sell any of the grain.

The hay crop was quite good. We have about 150 tons of good timothy hay, 30 tons of timothy straw, 30 of mixed hay of poorer quality, with a large quantity of straw.

The corn is almost a month later than last year. The result now depends entirely on the frost. A severe frost, even at first of next month, would greatly injure much of our crop. If sufficient time be given for it to mature, the larger part of the crop will be fully equal to that of last year. It is proposed to cut about 30 acres, if practicable seeding the ground to rye and grass this fall.

The unusual wet spring made it impossible to plant about ten acres designed for corn. This was sown to millet; but the growth of weeds was such as to make the crop practically a failure.

I have never known a more favorable season for grass and clover. The pastures have been fresh and green during all the summer, and are now in fine condition, excepting some weeds on new seeding.

We have plowed about 30 acres for rye and seven for wheat. During the present week it is purposed to fill our silo with corn.

With few exceptions the live stock has done well. I have purchased during the season, 16 head of calves and yearlings, as we had abundance of pasture and will have of "rough feed" for the winter. We have been feeding eight steers, comparing different breeds. These will be ready for sale this fall. It is also purposed to sell an equal number, mainly fattened on grass. A few cows may also be profitably sold. The dairy cows and calves have done well. We have had some trouble from a disease of the eyes, which, however, has usually done no permanent injury. We have had the misfortune to lose two or three calves, dropped prematurely.

I have purchased or exchanged a few pigs to improve our breeding stock, which I now count as fully satisfactory. We will have a fair number of pigs for sale for breeding purposes.

About five miles of hedges have been trimmed; some board fence has been reset; a change in the years at the experimental farm barn has increased the convenience and improved the appearance. A wagon shed has been built. The platform scales on the stock farm had been long in use, and were in bad condition; they have been exchanged for an improved pattern, in placing which in position there has been an annoying delay on the part of the contractor.

During the early part of the vacation, I attended a three days' meeting of Professors of Agriculture and Horticulture, at the Iowa Agricultural College. This was the third annual meeting of the Association, and was of interest and value. In company with Prof. Baker, I attended the second Farmers' Institute, held under the auspices of the State Board of Agriculture—this at Decatur.

I have accepted invitations to deliver addresses at one or two fairs and before the State Wool Growers' and State Swine Breeders' association during the State Fair at Peoria.

At the Champaign County Fair the farms made a somewhat full showing of horses, cattle, hogs, specimens of grain, etc.

Respectfully submitted,

G. E. MORROW, *Professor of Agriculture.*

The following special appropriations were made:

\$200 from State appropriation for shops, for the purchase of tools for instruction of the classes in Shop Practice.

\$65.88 from current funds to cover the deficiency in State appropriation for Library cases.

\$60 from current funds, for purchase of matting for halls.

\$255.72 from current funds, for payment of the Regent's traveling expenses, as per approved bill.

The following general appropriations were made from current funds for the six months ending February 28th, 1882:

*Statement of Appropriations required for the Six Months ending  
February 28, 1883.*

Board expense.....		\$300 00
Salaries.....		12,000 00
Stationery and printing.....	\$300 00

Cabinets.....	9 45	
Students' government.....	25 00	
Examination of schools.....	25 00	
		90 41
Total.....		\$18,204 53

The recommendation contained in the Regent's report in regard to the assignment of rooms to societies, was approved.

On motion of Mr. McLean, a committee of five was appointed to present the wants of the University to the next Legislature. The Chairman of the Board, the Regent, Messrs. McLean, Pearman and Bennett, were so appointed.

The recommendations of the Regent as to the necessities of the University, were referred to the above committee.

The following report from the Executive Committee was received and approved:

CHAMPAIGN, ILL., September 12, 1882.

To the Trustees of the Illinois Industrial University:

The Executive Committee report that they have caused the following named repairs and improvements to be made, at the cost stated in each case respectively:

	Appropriation.	Cost.
Building Rifle Range.....	\$100	\$74 91
Building Front Fence.....	500	495 00
Painting Main Building.....	500	for Main Building.....
Mechanical Building.....	100	for Mechanical Building.....
Front Fence and Shelters.....	400	for Mansard.....
Plastering Mansard and Art Gallery....	800	623 38
Building Library Cases.....		865 88

E. COBB,  
J. T. FEARMAN,  
J. R. SCOTT.

The following amendments of Article IV, Section 1, and of Article IX, Section 1, were proposed:

*Resolved*, That Article IV, Section 1, of By-Laws of this Board, be amended as follows: After the word President, in second line of said section, insert the words "Vice-President."

*Resolved*, That Article IX, Section 1, of the By-Laws of this Board, be amended: After word University, on seventh line of said section, insert the following: "It shall be the duty of the Vice-President, in the absence or other disability of the President of the Board, to perform all the duties of the President, as above set forth, in as full and ample manner as said President."

All the present members of the Board voting aye, they were declared adopted.

Hon. R. B. Mason was unanimously elected Vice-President.

The following report of the Business Agent was read and received:

The following resolutions in regard to the University Printing Office were passed:

WHEREAS, The press, type, cases and other material in the printing office in the Mechanical building are the property of the University, subject to the control of the Trustees,

*Resolved*, That the Regent and Faculty be, and they are hereby requested to maintain constant supervision over said property; to permit its use by such students only as they approve, under such regulations as they may prescribe, and to reclaim it whenever in their judgment the interests of the University require such action.

Recess taken until 2:30 P. M.

AFTERNOON SESSION.

The Board met as by adjournment. Present as before.

The Corresponding Secretary, Prof. T. J. Burrill, laid before the Board the proceedings and papers to be published by the State as the biennial report of this University.

On motion of Mr. McLean, the report was received and ordered to be forwarded to the Governor.

The Auditing Committee made the following report:

*To the Board of Trustees of the Illinois Industrial University:*

The undersigned respectfully report that they have examined vouchers for which warrants have been issued, from No. 603 to 775 inclusive, and find the same correct.

ALEX. McLEAN,  
CHAS. BENNETT.

The committee also reported back the Treasurer's report as correct, and it was ordered to be placed on file.

Adjourned.

E. SNYDER,  
Secretary.

EMORY COBB,  
President.
