REPORT OF THE STADIUM EXECUTIVE COMMITTEE

(16) The following report from Mr. C. J. Rosebery, Stadium Manager:

For the Executive Committee of the University of Illinois Memorial Stadium, I wish to report that such Committee held a meeting on Thursday, June 29, 1922, 10 a.m., at the offices of Holabird & Roche, Architects, Chicago;

That the latest sketches showing the group and ground plans for the Stadium including a large charcoal perspective of one of the Stadium Stands, a model of the ramps, and various detail sketches were presented by Mr. John Holabird;

That the Committee approved the design providing for two stands, incorporating within the stands the double colonnade or promenade, such columns to be known as the memorial feature of the Stadium, as shown in the perspective; also that the Architects be instructed to call for an alternate bid placing approximately 96 columns in a colonnade detached from the Stadium to serve as an approach.

I further report that the Committee refused to accept the suggested resignation of Mr. H. S. Capron as a member of this Executive Committee.

The Committee approved contract entered into on June 14th with Stipes & Hecker of Champaign to furnish all the Portland cement required by the purchaser, estimated at 30,000 bbls. at \$2.52 per bbl. in cloth sacks or \$2.07 in bulk, to complete the construction of the Stadium, to be delivered in car lots f.o.b. Champaign or Urbana; shipments to be made between September 1, 1922, and January 1, 1924, not to exceed 3,000 bbls. in September, 3,000 bbls. in October, 1922, except at sellers option; the balance to be shipped on instructions from purchaser and as required by the progress of the work.

Terms of payment: Net cash 30 days or 10c per bbl. discount for cash in 10 days from date of invoice.

Contract provided that should the Company's market price in effect at delivery point named be reduced below the price named herein, a like reduction will be made on all cement shipped on this contract during the time such lower price is in effect.

The Architects expect to have plans and specifications ready for the contractors on July 19 and it is hoped that contract can be awarded three weeks later with the possibility of building operations commencing during the last week in August or early September.

This report was received for record.

FEES IN MUSIC

(19) A recommendation that certain regulations governing fees in the School of Music, adopted April 12, 1922 (see page 183), be amended to read as follows:

1. That a special fee of \$25 a semester be charged for instruction in applied music of students *enrolled* in the School of Music or in the course in music education in the College of Education, beginning September 1, 1922.
2. That a special fee of \$25 a semester be charged for one half-hour lesson a week in applied music through the semester, of all students enrolled in other colleges of the University who are taking collegiate work in applied music; and that a special fee of \$10 a semester be charged all students enrolled in other colleges of the University who are taking introductory work in applied music, beginning September 1, 1922.

On motion of Mrs. Evans, these amendments were approved.

INCREASE IN TELEPHONES

(20) The Supervising Architect requests permission to increase the number of Bell telephones from 112, as previously authorized, to 122. I recommend approval.

This request was approved.

At this point Mrs. Blake took her place with the Board.

PROPOSED BUILDING PROGRAM

(21) I recommend for tentative approval the following list of buildings for submission in our next budget to the Legislature:

1. Library Building and Equipment.....\$750,000
2. Woman's Residence Hall and Equipment..... 250,000

3. Men's Gymnasium and Equipment.....	500,000
4. Commerce Building and Equipment.....	500,000
5. Agricultural Building and Equipment.....	400,000
Total.....	\$2,400,000

This schedule provides \$250,000 more for the proposed Library Building and Equipment than was asked for two years ago. The delay has made it imperative to put up a larger unit of the building than would have been necessary if we had secured the money asked for at the last session of the General Assembly. No building is more imperatively needed than a new Library. Every department of the University is suffering because of the crowded conditions of our Library. Educational progress is retarded. I feel that the importance of this matter can not be over-emphasized. Whatever else is done, it is imperative that this building be secured.

We need a second Woman's Residence Hall, similar to that existing hall on Nevada Street. This can be duplicated for the amount indicated.

I am suggesting a men's Gymnasium with equipment, for several reasons. In the first place, the College of Engineering needs more laboratory space. The building formerly used as an Armory, now known as the "Gym Annex" is admirably suited for the work of an Electrical Engineering Laboratory. Similarly, the so-called "Engine Room Annex," the brick addition made to the old Armory during the war and used as an engine room laboratory for students in aviation, is admirably suited for the work of the Engineers. One at least of these is needed by the Engineers. We have the choice of constructing a large new laboratory for the engineers or of freeing these two buildings and equipping them wholly or partly for their use. I think the latter method is preferable for several reasons. In the first place, the military work is now half a mile or more away from the Gymnasium. The proposed Stadium will be in the neighborhood of the Armory. The men's Gymnasium should be in the proximity of both these buildings. The work in physical education and athletics will therefore be served by erecting a new Gymnasium in the neighborhood of the Armory; and the work of the College of Engineering will be served by securing the use of the buildings referred to above, now used as gymnasiums. The proposed arrangement, I think, is the most economical that could be proposed, and would be as satisfactory from a service point of view as any other arrangement.

A Commerce Building with equipment is proposed, for several reasons. In the first place, the present building is wholly inadequate, on account of the increase in the number of students in the College of Commerce and Business Administration. They have multiplied more than four times since the present building was erected. In the second place, the students in the Arts and Sciences need the classrooms in the present Commerce Building. If they can not get these, it will be necessary to erect a new general classroom building somewhere on the campus. The purposes of both Colleges will be better served by erecting a new building for the College of Commerce, south of the Auditorium, vacating the present building for general classroom use, and taking care of any overflow in the new Commerce Building.

In accordance with the general policy which I have outlined at various times, we should make special provision each biennium for some one of the great divisions of the University, with a view to making its quarters and equipment as complete as possible. The last General Assembly gave us half a million dollars for an Agricultural classroom and office building. This needs to be supplemented with a group of buildings of a laboratory type, including cattle barns, in order to bring our equipment into a modern condition. After this is done, equivalent provision should be made for the College of Engineering. In the meantime, adequate facilities will be provided for it by the addition of one or two laboratories

in the buildings now used as gymnasiums, mentioned above. It is my present opinion that by another biennium it will be advisable to seek an appropriation for a building for architecture and kindred subjects, to be erected on the quadrangle south of the Auditorium. This will release considerable space for other departments of the College of Engineering, and will also enable us to remove such work as art and design and related subjects from their present quarters, thus easing the situation for the Arts and Sciences.

We are in sore need of a Service Building. It is possible that the program outlined above will release part of some building north of Green Street for this use. Otherwise, we shall be under the necessity of erecting such a building.

I ask tentative approval for this program, using the word "tentative" to mean that the matter will come up for final approval in the fall.

On motion of Mrs. Evans, this program was approved tentatively.

At this point, at 1 p. m., a recess was taken.

AFTERNOON SESSION, JULY 12, 1922

When the Board convened after the recess, the same persons were present as during the morning.

Mr. Schmidt and Mr. Bentley, of the firm of Schmidt and Garden, were present.

PLANS FOR MEDICAL LIBRARY AND LABORATORY

Mr. Schmidt presented the revised plans for the Medical Research Library and Laboratory building.

On motion of Mr. Noble, the action of the Board on April 12, 1922 (page 187), approving the plans for this building, was reconsidered.

On motion of Mrs. Blake, the action of April 12 was rescinded, and the revised plans, designated as "Scheme J, June 3," were approved and adopted, and the architects were instructed to get bids for the construction of the building.

The Board resumed its consideration of matters presented by the President of the University.

PLOTTING ATHLETIC ASSOCIATION AND UNIVERSITY LAND

(22) I have discussed with Mr. George Huff, President of the Athletic Association, the advisability of plotting and selling the twenty acres now held by the Athletic Association between First Street and the Illinois Central Railroad, and in addition the ten acres held by the University adjoining this property on the south. The removal of our north line, west of Wright Street, from Armory Avenue towards the south would make it possible for us to get on without this property. The Athletic Association is planning an independent storm-water sewer from the Stadium recreation field, and drainage into this from these lots could be easily secured.

I request authority to take this matter up and report to the Board at a later meeting on the advisability of plotting these tracts in city lots with a view to selling them off.

On motion of Mrs. Blake, this authority was granted.
